

INSPACE MEDIA TEAMS UP WITH AVIAN FLEET

Inspace Media, the leading provider of illuminated chevron and safety signage, has entered into a strategic partnership with vehicle installation specialist Avian Fleet. Under the agreement, Avian Fleet will act as the company's national installation partner – providing mobile engineering support and fitting services – and become an approved distribution agent offering its complete product range to new and existing commercial fleet customers.

"Avian Fleet is one of the most established fleet installation specialist's in the UK, with over 30 years of industry experience, so they are an ideal partner to support us moving forward," explains Alex Knowden, Director of Sales and Business Development at [Inspace Media](https://www.inspacemedia.co.uk). "This latest agreement will enhance our installation offering, enabling us to provide a high-quality, hassle-free solution at our customers' locations and better meet the growing demand for illuminated chevrons and safety signage."

Inspace Media will deliver mobile nationwide installations using Avian Fleet's team of over 120 field-based engineers. Each of the engineers possess the training and certifications required to handle both the decal fitting and electrical elements of the installation process. As a result, commercial fleet operators will now be able to benefit from the quickest, most convenient and cost-effective solution available, while keeping any vehicle downtime to an absolute minimum.

The next level of safety chevrons

Graham Price, Managing Director of [Avian Fleet](#) commented: "We are excited to team up with Inspace Media and be involved in the launch of their innovative illuminated chevrons and safety signage. We are always looking for emerging fleet technology manufacturers to both partner and share our specialist installation expertise with. Roadside safety is a critical consideration for any commercial fleet operation, so we truly believe that Inspace Media's solutions have tremendous growth potential because of the ability to reduce risk exposure and better protect drivers, work teams and members of the public."

Inspace Media's [illuminated chevron and safety signage solutions](#) are designed to dramatically improve visibility and create a safer working environment for those operating at the roadside or next to a live lane. The unique and revolutionary technology is suitable for all types of vehicles – including HGVs, vans, cars and specialist vehicles – and provides dramatically greater visibility than a premium-grade Chapter 8 chevron solution. This enables vehicle operators to mitigate fleet risk and overcome duty of care concerns for their recovery, emergency, delivery and works teams.
